Minutes:		
Topic	Summary of Discussion/Decision	
Incorporating Interview Feedback into Application Design:	The team reviewed feedback from previous user interviews to identify preferred features for Cookify, such as ingredient filtering, recipe recommendations, and a user-friendly layout. They discussed ways to integrate these features into the app’s design and created a preliminary plan for the application’s structure and main navigation routes.	
Wireframe and Prototype Development:	A wireframe was created to visualize the app layout, structure, and navigation based on the planned features. This wireframe will serve as a foundation for prototyping and further development.
