PROJECT STATUS REPORT

Project Name	Cookify
For Week Ending	November 3, 2024
Project Status	[Green 🙂 , Yellow 😐 , or Red ☹]
Status Description	Currently the project is at a green status, we are up to date with our tasks and are ready to start the development phase

Activities—During the Past Week

- Developed multiple **low-fidelity prototypes** to explore various design options.
- Created a **high-fidelity prototype** based on selected design features.
- Designed **storyboards and wireframes** to finalize the visual and functional direction.
- Updated the solution to better address project goals and requirements.
- Meeting schedule TBD

Activities—Planned for Next Week

- Begin **front-end development** using HTML, CSS, and JavaScript.
- **Set up and link databases** using MongoDB and Express.
- Implement **authentication** features with Passport and Express.
- Additional tasks to be determined (TBD) based on team progress.

Project Issues

- With exams approaching, all team members will have limited availability. The meeting schedule will be adjusted to accommodate this.

Project Changes

- The solution has been updated from a **static webpage with keyword matching** to a **dynamic webpage utilizing a database and external APIs** for enhanced functionality.
